EXECUTIVE PROFILE

Business Intelligence and Analytics leader with **15+ years** of experience building and scaling analytics capabilities across Recruiting, Finance, Procurement and Operations. Proven track record of establishing BI functions, leading multidisciplinary teams and translating complex enterprise data into executive decision-support, analytics products and automation solutions.

Currently leads an Analytics & Development team supporting **Google recruiting operations** through Randstad Enterprise, with responsibility spanning business intelligence, SQL-based analytics, executive reporting, data management, application development and **AI-enabled analytics**. Experienced in partnering with senior business and technology leaders to define strategic questions, establish KPI and reporting frameworks, and convert business requirements into scalable analytical solutions.

Brings a combination of enterprise **BI leadership** and hands-on technology depth, with recent focus on **AI-powered analytics**, recruiting intelligence and digital products that extend traditional BI beyond dashboards and reporting.

PROFESSIONAL EXPERIENCE

GOOGLE (Sourced by Randstad Enterprise)

Senior Manager – Business Intelligence

Lead a 6-member Analytics & Development team supporting Google's recruiting operations, responsible for end-to-end business intelligence, executive reporting, data management, application development and AI-enabled analytics.

 | Sep 2024 - Present
Hyderabad, India

- Reduced reporting turnaround by approximately 20%** by analyzing and consolidating more than 2,000 ad hoc data requests from the prior year and converting recurring information needs into a customizable self-service dashboard with downloadable reporting.
- Manage a **portfolio of 30+ recurring analytics products and dashboards** supporting Recruiting, Sourcing, Scheduling and the broader end-to-end recruiting lifecycle.
- Automated weekly, monthly and quarterly business review processes, reducing manual reporting effort and generating 1,000+ hours of annual productivity savings while improving consistency of recurring leadership reporting.

GOOGLE (Sourced by Randstad Enterprise)
Senior Manager – Business Intelligence (Continued)

Sep 2024 - Present
Gurgaon, India

- **Own the analytics lifecycle from business question to decision support**, translating complex recruiting requirements and enterprise datasets into scalable analytical products, reporting and actionable insights.
- **Partner with senior business, recruiting and technology stakeholders** to define analytical requirements, establish KPI and reporting mechanisms and deliver data-driven solutions supporting recruiting decisions.
- **Helped establish the APAC analytics capability from the ground up**, defining SQL-based data extraction, standardized reporting processes and stakeholder information-distribution mechanisms.
- Oversee **data extraction, validation, structuring and analytical processes** across backend data environments, strengthening data quality, consistency and reliability across business reporting.
- Contribute to **AI-powered analytics and recruiting intelligence solutions** spanning backend data analysis, job-description analysis, candidate recommendation and resume-to-job alignment; an AI-enabled candidate-analysis solution reduced evaluation turnaround from approximately **one day to a few hours**.
- Help evolve the BI function beyond traditional dashboards through **self-service analytics, AI-enabled intelligence, intelligent automation and digital analytics products**, contributing across requirements, solution design, development, testing and stakeholder refinement.

CONDUENT BUSINESS SERVICES

Mar 2018 - Sep 2024
Gurgaon, India

Manager – Business Intelligence → Senior Manager – Data Analytics & BI

Progressed from Manager – Business Intelligence to Senior Manager – Data Analytics & BI, leading BI and analytics initiatives across Finance, Procurement, Operations, FP&A and enterprise support functions.

- **Established and scaled a centralized BI and Management Reporting capability** supporting Sourcing, Procurement, Invoicing, Contract Management, Supplier Management, Accounts Payable and FP&A across multiple business functions.
- **Led a multidisciplinary team of approximately 12+ analysts, FP&A specialists, product analysts and technology resources**, delivering analytics and reporting used for strategic planning, cost management and operational performance.
- **Partnered with the CEO, CFO, CTO and 25+ senior business leaders**, delivering executive reporting and analytical insights across an estimated **\$50M+ annual spend and operating portfolio**.
- **Managed a portfolio of approximately 40+ dashboards, analytical products and recurring reports**, providing leadership visibility into Spend, Revenue, Savings Opportunities, Supplier Performance, Customer Satisfaction, Quality and other enterprise KPIs.
- **Drove cost and performance analytics** across vendor management, sourcing, resource allocation and third-party spend, identifying approximately **\$2M+** in potential savings and cost-optimization opportunities.
- **Built and automated 25+ recurring reporting and management processes**, reducing manual effort by approximately **35%** and generating an estimated **1,500+ hours** of annual productivity savings while improving reliability and consistency.
- **Established standardized employee and contractor reporting** across India, US and Canada, consolidating workforce information for approximately **7,000+ employees and contractors** into a unified reporting framework.
- **Acted as the bridge between business leadership, enterprise data and technology**, translating complex business requirements into scalable BI, automation and analytical solutions while improving reporting consistency and decision-making speed.

Business Analyst

Sep 2010 - Sep 2011
New Jersey, USA

Performed **financial data analysis** and reporting across financial statements, expense overheads, budgets and account transactions, while partnering with **Quality Assurance** and cross-functional teams on website/application quality initiatives, team enablement, workshops and process improvement.

Tarleton State University
Graduate Assistant - Internship

Sep 2009 - Aug 2010
Texas, USA

Managed departmental **budgeting, daily expense tracking**, annual inventory reviews and purchase requests for Engineering & Physics, while supporting advisory board meetings, lab activities and faculty scheduling/administrative coordination.

SELECTED TRANSFORMATIONS & ANALYTICS PRODUCTS

- 1

AI-Powered Recruiting Intelligence Platform: Contributed to the development of an end-to-end recruiting solution combining AI, job-description analysis, candidate recommendation and resume evaluation into a unified workflow.
- 2

AI-Powered Data Analysis: Supported the development of an AI-based analytics capability that analyzes backend data tables and generates business-oriented insights, reducing manual exploration of large datasets.
- 3

APAC Analytics Function: Supported the setup of an APAC analytics capability from the ground up, including SQL-based data extraction, reporting processes and stakeholder information distribution.
- 4

3P Contractors Analytics : Developed a process to collect, consolidate and reconcile contractor information and generate meaningful monthly insights for stakeholders.
- 5

Conduent Idea Box : Developed a platform concept to capture ideas related to emerging technologies and identify opportunities for potential business use.
- 6

Automation Email Solution : Developed an automated distribution process using Advanced Macros and Power Automate to send required files to 200+ stakeholders.
- 7

Hawkeye : Developed a solution to capture employee activity information, including activity duration, break timings and login/logout data.
- 8

GBSS Mastermind : Developed an automated platform to collect internal process-improvement ideas from users and support innovation initiatives.

AWARDS & RECOGNITION

- Successfully established centralized **Reporting & Analytics functions** across Finance, Procurement, Operations and Recruiting **at Google**
- Delivered multiple **BI and automation solutions** that reduced manual reporting and processing effort at **NTT DATA**
- Recognized through multiple **employee performance awards** and peer recognition programs at **NTT DATA**.
- Recognized for successful implementation and delivery of the **Ericsson Threshold Analysis Project**.
- Received the **Best Team Player Award** at **American Express**.
- Recognized for innovation through the development of the **GBSS Mastermind improvement platform at Ericsson**
